

Patient Name		Kent & Medway SACT proforma		Date Calculated →	Protocol Number HAEM-ALL-009
Patient Number		<p align="center">Maintenance Phase (oral) Acute Lymphocytic Leukaemia Curative / Non-curative / Remission</p> <p align="center">Cycle No..... (Repeat every 2 weeks) Length of cycle: 14 days No. cycles: From week 20, to continue for 18 months</p>		Height (m)	Authorising Consultant: M Aldouri / S Rassam
DOB				Weight (kg)	 Pharmacist: J. Sawyer / O Okuwa Review by April 2018 Version 2
Consultant				Surface Area (m ²)	Allergies:

Notes

- Haematological - Neutrophils $0.5 - 1.0 \times 10^9/L$ or platelets between $50 - 100 \times 10^9/L$, reduce Methotrexate and Mercaptopurine to 50%. Keep at this dose until counts rise above these levels, then increase both drugs to 75% of recommended protocol dose for 2 weeks and to 100% if tolerated.
- Neutrophils $< 0.5 \times 10^9/L$ or platelets $< 50 \times 10^9/L$ stop both Methotrexate and Mercaptopurine. Restart drugs at 50% dose once neutrophils $> 1.0 \times 10^9/L$ and increase as above to 75% and 100% as tolerated.
- Repeated falls in Hb may be due to Mercaptopurine intolerance, in which case reduce Mercaptopurine ONLY as above. Keep Methotrexate at full dose. If persistent anaemia occurs ($< 80g/l$) despite the reduced dose of Mercaptopurine, modify the Methotrexate dose. If counts fail to return to normal check remission status.
- NB Co-trimoxazole may cause neutropenia, if counts fail to recover after both Methotrexate and Mercaptopurine have been stopped for 2 weeks, then review prophylactic Co-trimoxazole.
- Diarrhoea and vomiting; severe mucositis - stop Methotrexate and Mercaptopurine. Restart at 50% protocol dose once symptoms resolve and escalate to full dose when tolerated.
- Liver dysfunction - if patient experiences clinically significant liver dysfunction (jaundice) stop Methotrexate until symptoms improve. Re-start at 50% protocol dose and increase as tolerated. If liver dysfunction recurs discuss with consultant.

TTO MEDICATION	Drug	Dose	Route	Directions	Date	Quantity	Disp	Check
Day 1/...../.....	MERCAPTOPYRINE (75mg/m ²)		po	Daily				
	METHOTREXATE (20mg/m ²)		po	Weekly				
	Co-trimoxazole	480mg	po	bd on 3 days per week(Mon, Wed, Fri)
