

Kent and Medway Cancer Collaborative

Acute Oncology and Cancer of Unknown Primary Alliance Group

AOS DIRECTORY

September 2019

INTRODUCTION

Kent and Medway geographic area captures a population of 2.1 million covered by 4 Trusts and 7 Hospitals.

Across Kent and Medway there is an Acute Oncology and Cancer of Unknown Primary Alliance Group with strategic role committed to drive improvement on patient care through new pathway development and guidance for existing services and four Acute Oncology Services with operational role directly involved in patient care for oncological emergencies and new cancer presentations of unknown primary.

There is variation across the patch on the way Acute Oncology Services are provided and led but with clear common focus on best possible patient centred care and best use of current resources provided by each organisation.

The Kent and Medway Cancer Collaborative (KMCC) AOS Directory is the result of the combined efforts of the 4 KMCC provider organisations in Kent. It is recognised that many patients are treated in one place for their cancer but attend their local hospital when there is an emergency. There is often little information available at the local hospital about the patient's condition and treatment, so knowing who to call at the treating hospital is vital.

This directory provides the contact details for both in- and out-of-hours acute oncology service (AOS) staff, chemotherapy departments, tumour-specific clinicians and nurse specialists and palliative care services for every acute hospital in Kent, in an easily accessible format.

The AOS Directory, while useful for all healthcare professionals, is particularly aimed at AOS, Emergency Department and Acute Medical Clinicians, as well as Primary Care Physicians and Nurses. Useful information for cancer pathways and patient appropriate management will be provided with the appropriate contacts available to healthcare professionals and patients will benefit from having up-to-date clinical information about their care passed smoothly between all relevant different teams involved in their care in an efficient manner.

This directory will be updated regularly, so please email any amendments to the contact details to annette.wiltshire@nhs.net or c.chamberlain3@nhs.net.

DARTFORD AND GRAVESHAM NHS TRUST/DARENT VALLEY HOSPITAL

Trust Main Telephone Number	01322 428100
AOS In Hours	AOS Out of Hours
<p>Phone: 01322 428100 Ext: 6796 Mobile: Bleep: 988 Email: acuteoncology.dvh@nhs.net</p> <p>Contact with the CNS' is best made either via email or through the Main Telephone Number and bleeping 988. Messages can be left on the extension number.</p>	<p>Chemotherapy emergency phone: 07979 770755 Phone: There is a 24 hour Consultant Oncologist telephone on call service to provide advice to health care professionals about the management of patients presenting with acute oncology problems. The Oncologist on call can be contacted via the switchboards of Maidstone or Canterbury hospitals. Maidstone Hospital – 01622 729000; Canterbury Hospital – 01227 766877</p>

DVH provide a 7-day nurse-led service, 09:00 – 17:00 weekdays and 08:00 – 16:00 at the weekends.

They support the Chemotherapy Nurses with covering the 24 hour telephone helpline, and the Band 6 on-call nurses help with covering the AOS on Sundays as needed.

The team are supported by a Consultant Physician (Acute and General Medicine, and the Vague and Indeterminate Signs and Symptoms Service) and Registrar. The oncology ward (Rosewood) shares beds with haematology and medical patients. The team meet at midday to review the patients and the Consultant will examine the outliers as necessary.

The visiting Oncologists attend daily (other than Tuesdays) but are available via telephone and email.

There is a robust flagging system in place to track patients admitted through the ED; there is a referral system via Patient Centre or the bleep.

The AO CNS' follow up patients admitted where needed, highlighting patients who require transfer to Rosewood ward, assessing patients in clinic within the chemotherapy unit (Pine Therapy) either as urgent reviews or follow-ups and following up patients who are either inpatients or at home where needed.

Patients also call the office line or the bleep if they are unwell, or cannot contact their own CNS or the Pine Therapy Unit.

The AOS work very closely with the Palliative Care Team, sharing office space allowing easy liaison about patients.

EKHUFT Acute Oncology Service

Provision of 5 Day Nurse Led Inpatient Service, Monday - Friday 0800 - 1600. Single Point Access for hospital teams and primary care. Acute Oncology Team provides specialist oncology advice, assessment and review of patients with suspected or known cancer diagnosis. Acute Oncology also supports Sarcoma, Brain and CUP patients as there are no designated CNS'. Acute Oncology are responsible for following up MUO/CUP patients to inform re MDM outcome following discussion at UGI MDM. The Acute Oncology team work closely with CNS and palliative care teams and attend the weekly Palliative MDM. Currently, EKHUFT Acute Oncology Service consists of a team of 3 WTE, 2x Macmillan Acute Cancer Site Matrons and 1 x Macmillan AONP. EKHUFT does not have oncology inpatient beds. Haematology inpatient beds are based at K&C hospital site. Below are the inpatient criteria for referral and following in line with national and Alliance tiers of care. EKHUFT are in the process of recruitment for the acute oncology team to move towards a 7 day service for January 2020.

MEDWAY NHS FOUNDATION TRUST

Trust Main Telephone Number	01634 830000
------------------------------------	--------------

AOS at MFT is a consultant led service dedicated to support patients presenting with oncological emergencies, patients with a new diagnosis of cancer but also inpatients and outpatients who are undergoing investigations for malignancies of undefined origin. AOS at MFT also covers oncology patients admitted on Lawrence Ward, the haematology/oncology inpatient ward at MFT where an oncology ward round takes place Monday-Friday. Oncology inpatients on Lawrence ward might be admitted because of NS and all SACT/Radiotherapy related side effects, MSCC or when urgent chemotherapy is required while the patient is not yet able to be discharged. The MSCC co-ordination is conducted by AOS at MFT in liaison with King's College Hospital MSCC service and KOC Radiotherapy Service. AOS is involved with teaching for doctors in the Trust and takes part on induction training programme. The Cancer of Unknown Primary MDM takes place every Thursday linked to the Lung MDM.
