# ARIA CLASSIFICATION GUIDE FOR ADULT REGIMENS

ARIA classifies regimens by disease site which are linked to the patient's ICD-10 diagnosis code so when opening the medications window to initiate treatment, the system will automatically display the disease site folder associated with the entered diagnosis. Every regimen will have a disease site and some will also have a cancer category, shown as a sub-folder when prescribing. If a cancer category is listed in the table it must be added to the regimen including clinical trials regimens which will always have a cancer category. In all cases, only those disease sites and cancer categories listed below should be used in ARIA regimens. Multiple disease sites and cancer categories can be added to a single regimen where appropriate.

| DISEASE SITE | NON-TRIALS CANCER CATEGORY | CLINICAL TRIALS CANCER CATEGORY | NOTES |
|---|---|---|---|
| Anal Canal | | Clinical Trials - Anal Cancer | |
| Bladder | | Clinical Trials - Bladder | |
| Brain | | Clinical Trials - Brain | |
| Breast | Early breast cancer | Clinical Trials - Breast | |
| | Metastatic breast cancer | | |
| Cervical | | Clinical Trials - Cervical | |
| Colon | | Clinical Trials - Colon | |
| Digestive (Misc.) | | Clinical Trials - Digestive | Use for all UGI regimens |
| Haematology | Myelodysplasia | Clinical Trials - Myelodysplasia | |
| | Myeloproliferative Disorders | Clinical Trials - Myeloproliferative | |
| Head & Neck | | Clinical Trials - Head & Neck | |
| Heart | Malignant Thymoma | Clinical Trials - Malignant Thymoma | |
| Hodgkin's Disease | | Clinical Trials - Hodgkin's Disease | Use for Hodgkin's Lymphoma |
| Kidney | | Clinical Trials - Kidney | Use for Renal Cell |
| Leukaemia | ALL | Clinical Trials - ALL | |
| | AML | Clinical Trials - AML | |
| | Hairy Cell | Clinical Trials - Hairy Cell | |
| | CLL | Clinical Trials - CLL | |
| | CML | Clinical Trials - CML | |
| Lung | NSCLC | Clinical Trials - NSCLC | |
| | SCLC | Clinical Trials - SCLC | |
| Melanoma | | Clinical Trials - Melanoma | |
| Myeloma | | Clinical Trials - Myeloma | |
| Non-Hodgkin's Lymphoma | | Clinical Trials - Non-Hodgkin's Lymphoma | |
| Ovarian | | Clinical Trials - Ovarian | |
| Penis | | Clinical Trials - Penis | |
| Pleural Mesothelioma | | Clinical Trials - Pleural Mesothelioma | |
| Prostate | | Clinical Trials - Prostate | |
| Rectal | | Clinical Trials - Rectal | |
| Skin | | Clinical Trials - Basal Cell | |
| | Cutaneous Squamous Carcinoma | Clinical Trials - Cutaneous Squamous | |
| | Merkel Cell Carcinoma | Clinical Trials - Merkel Cell Carcinoma | |
| Testicular | | Clinical Trials - Testicular | |
| Thyroid | | Clinical Trials - Thyroid | |
| Uterine | | Clinical Trials - Uterine | |
| **Any disease site above** | Alternative immunotherapy regimen | | Use for single agent immunotherapy regimens that are not the preferred option as specified on the protocol |
