

HOW TO SET UP TEST PATIENTS IN ARIA FOR REGIMEN VALIDATION

Two test patients should be created for each regimen to be validated. In all cases a pharmacist test patient should be created following steps 1-6 below

- For K&M SACT and support regimens, a second validator test patient should also be created following steps 1-7 below
- For Clinical trials, paediatrics and non-K&M SACT and support regimens, a consultant test patient should also be created following steps 1-6 below, and this patient will also be used for the nurse validation.
